#### Monthly update - March 2018

Michael Rong +61 3 9640 3863 | michael.rong@wilsonsadvisory.com.au; William Liu +61 2 8247 3187 | william.liu@wilsonsadvisory.com.au

#### **Domestic market**

The S&P/ASX 200 Accumulation Index fell 3.8% in March, topping off the worst Q1 performance since the GFC despite a mostly positive earnings season in February. Potential inflation is still a concern for investors, and the market is steeling itself for the next rate hike from the RBA, which, when it finally comes, will be the first increase since November 2010. All sectors aside from property were down over the month, with defensive utilities shares (-0.8%) able to stem losses, and industrials (-0.9%) supported by gains from Brambles (+4.0%).

Telecommunications (-6.2%) was the worst performing sector, with Telstra (-6.3%) falling to its lowest price since 2011 and still finding its way in a very different marketplace since the arrival of the NBN. Financials (-5.9%) took a hit through the month, with major lenders coming under pressure as the financial services royal commission began testimony, while investment managers suffered from further market falls. Materials (-4.2%) continued its slide since the start of 2018, with Fortescue Metals (-14.1%) following the iron ore price down and Rio Tinto (-10.4%) lower despite announcing the sale of its last remaining coal asset.

#### Global markets

The MSCI World ex-Australia Index returned -2.3% in both Australian dollar and local currency terms as global equity markets continued to slide through March. While underlying economic data is broadly positive, markets remain concerned about the prospect of inflation as well as the potential for a trade war between the US and China. The US S&P 500 Index was down 2.7% on the back of February's 3.9% fall, reaching a high of 2,787 points to finish the month at 2,641. The VIX settled early in the month at 14.6 before jumping higher to 24.9 – still elevated compared to the historic lows of 2017. Financials (-4.5%) were hardest hit, with big falls from Citigroup (-10.6%) and Wells Fargo (-10.3%). Information Technology (-4.0%) was another sector under pressure in the wake of Facebook's data crisis, with Facebook A shares down 10.4% and Alphabet A shares dropping 6.1%.

In Europe, the Stoxx Euro 600 Index fell 2.3%, with banks also suffering, led by the beleaguered Deutsche Bank (-14.2%), which took action to replace CEO John Cryan after reporting its third annual loss in a row. Resources shares (-4.5%) also took a hit down, including Glencore (-8.4%) and Anglo American (-6.7%). In Asia, the Chinese CSI 300 Index was down 3.1%, Japan's Nikkei 225 Index fell 2.8%, and Hong Kong's Hang Seng dropped 2.4%.

#### Wilsons Investment Strategy

#### **Currencies**

The AUD was down 4.0% in trade-weighted terms over the March quarter, with cooling commodity prices and fears of a trade war weighing on the currency. The AUD fell 1.7% against the USD, hitting a high of 0.8110 in late January to end the quarter at 0.7679. The AUD was down against the EUR (-4.2%), JPY (-7.3%), GBP (-1.7%) and NZD (-3.6%). The US Dollar Index fell 2.3% over the March quarter, down against major currencies including the EUR (-2.6%), JPY (-5.7%), GBP (-3.7%) and CHF (-2.3%).

For the AUD, the situation is complicated. Australian rates are now below US rates across the yield curve, and this may be amplified as the Fed continues to tighten policy. This may place downward pressure on the AUD, although the USD itself is soft, undermined by growing 'twin deficits' (both the budget and current account).

#### Commodities

The nascent commodities recovery took a hit in March with fears of a tariff war taking its toll on metals. Base metals fell through the month, with aluminium (-6.0%), zinc (-5.2%), lead (-4.3%), nickel (-3.6%), copper (-3.1%) and tin (-2.0%) all down. Gold rose 0.5% to end the month at US \$1325.48/oz following a volatile February. The spot price of iron ore delivered to China (62% Fe) fell 18.7% from US \$75.59/t to \$61.49. In oil markets, the Brent spot price rose 4.5% from US \$66.08/b to \$69.02 and WTI rose 5.6% from \$61.43 to \$64.87, shaking off trade fears but still softer since the start of February.

#### LIC key preferences

We provide an overview of our preferred LICs within each category:

- 1. Domestic equities large/medium cap and medium/small cap
- 2. Absolute return funds
- 3. International equities
- 4. Specialist funds

When selecting these funds we examined their performance against the following key metrics:

- NTA and total return (share price and dividends paid) performance has the LIC delivered on its investment objective of outperforming its underlying benchmark?
- Dividends paid and stability of dividends paid has the LIC paid a dividend to shareholders and has there been a stable and continuous dividend paid profile?
- Premium/discount to NTA what is the current premium/discount to NTA? How has the share price traded relative to its NTA through time?
- **Liquidity** is there sufficient liquidity to enter and exit the fund?
- Underlying management team is the manager well regarded in the market? Is there transparency in the underlying portfolio and the team's investment process?

#### **Fund description**

AMCIL manages a concentrated investment portfolio comprising 40 to 50 stocks covering large and small companies in the Australian equity market.

As a result, small companies by market size can have an equally important impact on portfolio returns as larger companies in the Australian market. The number of holdings in the portfolio will depend on market conditions and investment opportunities. The selection of stocks in the portfolio is based on attractive valuations as well as the outlook for growth and the competitive structure of the industry.

Given the concentrated investment focus of AMCIL, holdings will be sold from time to time to fund additional investments to the portfolio.

#### **Fund description**

The investment objective is to provide long-term capital growth over a five year-plus investment horizon through investment in a diversified portfolio of quality, undervalued ASX-listed equities and other investment securities, outside the ASX top 20 securities.

The ASX top 20's composition is very concentrated by sector, with the financials and materials sectors combined representing almost 70% of holdings. An investment portfolio that is based on stocks outside the top 20 has a much broader and evenly spread set of sectors.

It is QV's belief that companies ex the top 20 can still be leaders in their field with competitive advantages over their peers and strong recurring and predictable earnings offering greater opportunities for above-market returns.

As well as long-term capital growth, Investors Mutual (QV is one of IML's funds) is focused on long-term income growth, seeking investment opportunities that pay sustainable and growing dividends with active franking credits. The portfolio is managed from an Australian investor's perspective, with tax being an important consideration in its daily management.

#### **Fund description**

Spheria is an Australian small cap and microcap fund manager with a combined 40 years' of investment experience and an excellent track record, generating top-quartile returns to have relatively low risk.

The manager will seek to purchase securities in businesses where the present value of future free cash flows can be reasonably ascertained, and the security is trading at a discount to the assessed fundamental valuation. Preference will be given to companies it considers to have relatively low risks – entities that are geared to a level that the manager considers appropriate given the nature of the relevant businesses – and have free cash flow to support that relevant level of gearing.

#### **Fund description**

One of Australia's few specialist listed funds to invest in Australian microcap shares, Acorn Capital focuses on this generally neglected part of the market because of the lack of research in this area provides scope to uncover growth opportunities.

Acorn aims to exploit inefficiencies in the pricing of stocks that arise from information gaps about microcaps, and to identify opportunities for long-term growth. The fund is style and sector neutral, typically holding a portfolio of 65-80 stocks with a low expected portfolio turnover.

In November, two of Acorn's unlisted investments (Telix Pharmaceuticals and Ocean Grown Abalone) listed on the ASX contributing to the recorded performance of 8.8% in the month, compared to the 3.9% return of the S&P/Small Ordinaries Accumulation Index.

Acorn has also announced the \$7.5m acquisition of seven assets from Washington H Soul Pattinson. The acquisition will be funded by share issuance at its post-tax NTA. With part of the consideration deferred, this should be seen as an endorsement of Acorn's management team. The pro-forma market cap post the transaction will lift from \$50m to \$57m. Acorn has recently announced its intention to pay a higher annual dividend target 5% (up from 3%) of closing post-tax NTA (franked to the highest possible extent). With greater size and higher dividend payments it is possible that Acorn's discount to NTA could reduce.

#### **Fund description**

In a market-neutral structure, returns are derived from the difference in performance between a long and a short portfolio of shares. As both portfolios are of equal size, the fund is fully hedged, retaining little or no net exposure to the share market. Irrespective of whether the portfolios are rising or falling, a positive return is achieved when the long portfolio outperforms the short. In this way, returns from a market neutral strategy will have no correlation with the performance of the broader share market, reflecting instead the investment manager's success in selecting the right securities.

While the share market is generally efficient in valuing companies, there will always be a select group of companies that are mispriced at any given point in time. Watermark's investment strategy allows investors to benefit from its success in identifying "strong" companies to invest in and "weaker" companies to sell short, without being fully exposed to the volatility and risks of the share market.

#### **Fund description**

Access to a concentrated portfolio that will predominantly comprise long and short positions in global listed securities. The portfolio will be actively managed with a focus on capital preservation and aims to generate superior risk-adjusted returns over the long term (>5 years).

The listed vehicle provides access to an investment strategy and an investment manager that had only previously been accessible to wholesale investors with a \$1m minimum investment.

We view the investment manager favourably and believe that the team has deep expertise across equity markets; since inception in 2008 it has successfully implemented the same investment strategy with a strong and robust investment process.

#### **Fund description**

Portfolio performance

Long-short global securities investment portfolio with a currency overlay. The portfolio will aspire to accumulate wealth over the long term by generating positive returns in excess of the benchmark at below-market levels of risk.

The manager seeks to purchase securities in what it considers to be great businesses that are not valued as such and build a high conviction portfolio with a capital preservation focus. Investors should be aware that returns can vary considerably from broad index returns.

Antipodes was formed in March 2015 by Jacob Mitchell with the backing of Pinnacle Investment Management. The portfolio manager, Mr Mitchell, has more than 20 years' investment experience and prior to forming Antipodes was Deputy Chief Investment Officer and Portfolio Manager at Platinum Asset Management.

#### **Fund description**

MCP is an Australian debt-specialist fund manager. The investment team have on average 30 years' direct lending experience and has shown a strong track record in originating, structuring, negotiating, managing and distributing Australian corporate loans. The MCP Master Income Trust provides a unique opportunity to access monthly cash income from direct lending to Australian corporates.

Some of the characteristics of this investment opportunity are its attractive risk-adjusted returns from a diversified portfolio, monthly cash income with low risk of capital loss and low capital volatility, and access to floating rate credit.

Wilsons Corporate Finance Limited ACN 057 547 323, AFSL 238 383 acted as Joint Lead Manager in the September 2017 IPO and the February 2018 Entitlement Offer for MCP Master Income Trust securities for which it received fees or will receive fees for acting in this capacity. This document should be read in conjunction with the disclosures and disclaimer at the end of this document.
